SERVICE OVERVIEW

# Contour Managed Security

## See threats sooner. Respond with clarity.

Connect AI-assisted threat detection with experienced security analysts. Contour helps strengthen visibility, prioritize risks and coordinate response across your covered environment.

### AI-POWERED SOC AND SIEM

**Connect the signals**
With Adlumin technology from N-able, correlate supported endpoint, identity, network and cloud activity to surface meaningful threats.

**Reduce alert noise**
AI assistance helps prioritize suspicious activity and brings related signals together for analyst review.

**Investigate with context**
Give analysts supporting evidence and relevant activity so they can assess threats and determine next steps more efficiently.

**Coordinate a response**
Support authorized containment and remediation workflows, with human oversight for critical decisions.

### PROTECTION THAT FITS YOUR ENVIRONMENT

**EDR / Endpoint detection and response**
Monitor supported endpoints and investigate suspicious behavior.

**XDR / Extended detection and response**
Connect signals across supported security tools for a broader view of threats.

**MDR / Managed detection and response**
Combine technology with analysts who investigate activity and coordinate response.

**24/7/365 security monitoring**
Enterprise-grade SOC monitoring for covered environments, with integrations and response responsibilities defined in your service plan.

### Contour Security Marketplace

SentinelOne | Arctic Wolf | Cisco SaaS | Adlumin | Microsoft SPLA | CrowdStrike

**Protect today. Plan for recovery.**
Complement security operations with Contour Cloud protection and recovery services, including BaaS, DRaaS and AGSR. Align detection, response and recovery plans to your business priorities.
